Relevant Work Experience

Technical Success Analyst II

May 2022 – Present

Curinos, Inc. (Formerly Novantas)

New York, NY

- Manage technical configuration of banking optimization software for 6 clients totaling \$300B+ in deposits, ensuring software meets unique data constraints and desired features of each client
- Directly supervise and mentor two junior analysts, overseeing technical work, project planning, and client communication strategy
- Generate elasticity models, scenarios, balance flow metrics, and competitive analytics to advise clients in solving challenging deposit problems
- Leveraged SQL Server, Python, and Excel to install three multibillion dollar asset-sized clients– setting up ETL pipelines for automated data ingestion, instituting client-specific processing, and performing extensive data validations

DevOps Engineering Co-op

July 2021 – Feb 2022

MFS Investment Management

Boston, MA

- Spearheaded production of web-based user interface to automate onboarding and logging for all new software development projects
- Developed dashboard with maintenance capabilities and dynamic metrics for 500+ existing projects
- Implemented tools such as Bitbucket, Jenkins, SonarQube, and NexusIQ to develop and maintain continuous integration/continuous deployment (CI/CD) systems
- Leveraged Agile framework to communicate project updates, blockers, near-term goals and demonstrate significant milestones

Developer Co-op

Jan 2020 – June 2020

Bain Capital, LP

Boston, MA

- Created Python scripts that ensured consistency of data across multiple file formats, including .xlsx and SQL
- Generated interactive and visually appealing reports and online dashboards through use of Cognos Analytics
- Performed various automation tasks through use of Python and SQL scripting, including file monitoring, data validation, report creation, and report distribution
